

GEOGRAPHY TRANSITION WORK

We'd like the Year 11s to complete a diary entry for their Summer holiday transition work.

Disaster events in the news

Instructions: On a weekly basis throughout the summer ensure that you keep abreast of the news and record any **events relating to tectonic processes and coastal flooding**.

Your recordings will form a good basis of the work that you do for Paper 1 throughout Year 12 and so need to be thorough; ; these should, essentially, be mini-fact files.

I'd suggest you have dates, locations, causes, effects and other relevant supporting data e.g. people affected, number of deaths, monetary damage etc. Don't forget to keep a record of where you collated the data from.
